Work Experience

Softthrive – [Multan, Pakistan]

Junior MERN Stack Developer

November 2023 – December 2024

Company Description:

Softthrive is a tech solutions company that specializes in full-stack web and mobile development using modern technologies like the MERN stack, React Native, and cloud services. The company focuses on delivering scalable and efficient software solutions to a diverse client base.

Key Responsibilities:

- Built and maintained scalable web applications using MongoDB, Express.js, React.js, and Node.js (MERN).
 - Developed and consumed RESTful APIs to ensure smooth frontend-backend integration.
 - Implemented responsive UI components using React and Tailwind CSS.
 - Collaborated with cross-functional teams in Agile sprints, contributing to planning, development, and code reviews.
 - Optimized performance and enhanced user experience by fixing bugs and improving code efficiency.
 - Integrated third-party services and libraries to extend application functionality.
 - Used Git for version control and collaborated via GitHub.
-

Skills

Languages: JavaScript, C++, Python, PHP, C#

Core Stack:

- **Frontend:** React.js, Next.js, Tailwind CSS, JavaScript, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB
- **Tools & Libraries:** Git, GitHub, Framer Motion, Aether UI, Nodemailer

Basic Knowledge:

- Flutter & Dart (UI & navigation basics)
 - .NET Core (MVC structure and CRUD functionality)
 - PHP & MySQL (form handling and database integration)
-

Projects

Notes Keeping App

A full-stack note-taking application with authentication, allowing users to create, update, and delete personal notes.

🌐 [Live Site](#)

Tech Stack: MongoDB, Express.js, Next.js, Node.js

- Implemented secure user login and registration
- Built a responsive UI for managing notes
- Used Next.js API routes to handle server-side logic

URL Shortener

A simple and fast tool to shorten long URLs with redirection and storage features.

 [Live Site](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Generates short links with a unique hash
- Tracks and redirects to original URLs
- User-friendly UI with alert messages and clipboard copy option

Food Delivery Web App

An end-to-end food ordering and delivery platform with real-time email notifications.

 [Live Site](#)

Tech Stack: MongoDB, Express.js, Next.js, Node.js, Nodemailer

- Built secure user/admin dashboards and order workflows
- Integrated Gmail verification and order alerts via Nodemailer
- Designed with responsive layout and Tailwind CSS
